

Savannah Gomes

Date of Visit: March 12, 2013

College/University Visited: Harvard

Campus Location: Cambridge, Mass.

With whom did you attend this visit? I attended with some of the girls from my AP biology class.

What are three things you did on your visit? On our visit, we ate at Qdoba, went to the Harvard book store, and attended a lecture.

What is one thing you learned about this particular college/university or life beyond high school in general, that you did not know before? I learned that many Ivy League schools look the same! Harvard looks just like Brown. They have a similar vibe as well.

What did you not do that you wish you could have while on this campus? I wish we could have visited some of Harvard's other buildings instead of just the ones I've already been to.

Reflecting on this visit, what is one question you didn't ask but will ask on a future visit to a different college/university? I am still curious as to whether the posters around campus for various activities and clubs are ever taken seriously. Do many people go if they see the posters?

After seeing what this college/university has to offer, do you think you would be happy here? Why or why not? I think I would be happy there. It wasn't too far away from home, first of all. Second, though, it seemed nice. The buildings and the shops made everything seem exciting. But, then, I think anyone would be happy at an Ivy League.

How did you truly feel about this campus? What did you like the most? The Least? I really did like the campus. I liked the buildings. I did not like the ugly grass.

What seemed different or special about this school to you? I feel like this school is somewhere people know that they're special, but I like it.
