

Savannah Gomes

**Date of Visit:** Around November

**College/University Visited:** Smith College & Amherst College

**Campus Location:** Northampton, Mass. & Amherst, Mass.

**With whom did you attend this visit?** I went with Kyleen, Manuela, Stephanie, and others.

**What are three things you did on your visit?** We first went to Amherst College and started our visit with a group, but then we separated and went to the museum. Next, we went to lunch. Finally, we went had a question session with Smith College and we explored again.

**What is one thing you learned about this particular college/university or life beyond high school in general, that you did not know before?** I learned that I really like a school with good scenery. I felt so peaceful surrounded with all those trees.

**What did you not do that you wish you could have while on this campus?** We didn't take a professional tour at either of these, but I wish we could have; I would have been able to ask more questions.

**Reflecting on this visit, what is one question you didn't ask but will ask on a future visit to a different college/university?** I didn't ask whether, with a college consortium, if it's easy to take classes at the other schools or if it's more work.

**After seeing what this college/university has to offer, do you think you would be happy here? Why or why not?** I think I would be very happy at either of these. The nature aspect is a big deal for me. Plus, they're good schools.

**How did you truly feel about this campus? What did you like the most? The Least?** I liked the campus. It wasn't boring in the least. I didn't like that Smith was an all-girls school.

**What seemed different or special about this school to you?** I feel like this school is somewhere that nature can be a large part of studying. That's something I could enjoy.
